

Заглавие	Mental Spaces: Aspects of Meaning Construction in Natural Language
Вид на публикацията	Book
Година на публикуване	1994
Автори	Fauconnier, G
Издател	Cambridge University Press
Място на издаване	Cambridge
Език на публикацията	eng
Резюме	First published in 1985 (MIT Press), Fauconnier's influential book, <i>Mental Spaces</i> , was instrumental in shaping the new field of cognitive linguistics. The concept of mental spaces--that we develop constructs during discourse that are distinct from linguistic constructs but are established by linguistic expressions--provides a powerful new approach to problems in philosophy and cognitive science concerning thought and language. It includes a new preface that provides context for the theory, and a new foreword by George Lakoff and Eve Sweetser (both of U.C. Berkeley).
